The Innovation for Change (I4C) programme was born as a collaboration between CDI Italia, Politecnico di Torino, CERN Ideasquare

The aim of this challenge based program is to bring together the respective expertise and common goals on empowering future change makers (the MBA fellows of CDI and PhDs) and companies to enable technology for positive global impact.

Some of our corporate partners:

Daniele Massella, I4C 2017

PhD Chemical Engineering, Politecnico di Torino
PhD Materials and Mechanics, University of Lille
PhD Textile Engineering, Soochow University

"The experience of I4C revolutionized the way I work. Thanks to the programme, I learned to research the needs of our society and effectively apply my skills to propose innovative solutions. The skills acquired during I4C allowed me to win two awards by the Italian Chemical Society and Elsevier and the "Ermenegildo Zegna Founder Scholarship".

Zeynep Tulumen, I4C 2019

PhD Architecture, Politecnico di Torino

"I4C has been one of the most relevant experiences for my PhD career development. It gave me the possibility to work on the innovation project SpectrumLab, first at CERN and later in the WamdaX acceleration programme in Dubai. Due to these experiences, now I am a proactive member of my team for applying for research grants. Moreover, I had the chance to publish in CERN Innovation Journal, thus broadening my research portfolio beyond my core topics!"

COACHING

Quarterly sessions

Thanks to the activity carried out by the coach, the fellows are able to learn and develop new techniques and action strategies that will allow them to improve both performance and quality of life.

The coaching activity accelerates the growth of the individual allowing him to focus more effectively and consciously on the objectives to be achieved and the consequent choices to be made.

MENTORING

Monthly sessions

Individual sessions to help each Fellow to move from an engineering perspective to that of an entrepreneur or manager, to prepare for the company mission interviews and to aim to position well, young professionals with high potential within the company mission as well as in the search for their first job.

Group mentoring is carried out in small clusters during workshops.
