The recent Hamas attacks on Israel in October 2023 surprised the world. The Israeli response has been even harsher, causing thousands of casualties, primarily among civilians. Mainstream media often overlook the long-standing military occupation and the last 16 years of blockade in Gaza. Non-violent resistance efforts and social movements striving for peaceful coexistence are also seldom discussed. This Cosmos round table aims to highlight these overlooked alternatives to the conflict, showcasing historical efforts to end the Occupation and promote co-resistance.
