PORTUALI

Film screening

"Portuali" is a vivid portrait of the political struggle led by the C.A.L.P. – the Autonomous Collective of Port Workers of Genoa – between 2019 and 2023.

The film follows their strikes against the so-called "ship of arms" and their efforts to build a trade union capable of addressing the challenges of our time. It tells a story of workers fighting for safety in the workplace, standing against militarism, and reaching out to other dockworkers across the Mediterranean.

At its heart lies a dream – the dream of shaping a different, fairer world – and the personal and collective cost of pursuing it.
