Contact Number +39 350 0886733

E-mail: h.locorotondo@performatsalute.it

I carry out clinical consultancy and psychological support activities in an individual and couple setting, also in English. I am a Certified Professional (Become Hub-2023) for the use of Virtual Reality in augmented clinical practice through the use of a headset for an immersive and experiential approach aimed at working and giving meaning to the patient's life.

My work is aimed at individuals and groups of individuals and embraces the entire span of their lives, starting from childhood to adulthood. In 2023 I led groups aimed at supporting and enhancing the value of parenting in collaboration with the Municipality of Carrara and the search for effective tools aimed at supporting social life issues such as motherhood, being a woman in today's society, religiosity, and LGBTQ+ community is always active.

Thanks to rich experiences such as those at the America Italy Society in Philadelphia and the Asl-5 Department of Child Neuropsychiatry in La Spezia and Sarzana, I carry out projects relating to cultural and linguistic diversity and inclusion from a perspective focused on the resource, trying to limit stereotyping and discrimination also considering any issues inherent to typical or atypical development.

I teach Criminal Profiling at the University Master of Criminology and Criminalistics at the LINK CAMPUS UNIVERSITY in Rome, with a view to understanding and preventing others, the environment, and society.
